

SPH-NI700

Qualified factory number:10610013600676

Key Features

- High density structure design, density pressure over 20PSI
- Made of SUS304/316 stainless steel ,
anti-corrosion and salt resistant
- Made of high hardness Nano glass
- Filled with inert gas "nitrogen" to effectively reduce the
temperature of the equipment
- Inhibit the aging of the machine and avoid static spark
- Provide air release valve and waterproof quick coupling
- Protection level IP68

Model	SPH-T600EX
Material	SUS304/316 Stainless steel(options)
Protection level	IP68
Windows	176mm(L)-2mm(W) Highly translucent tempered glass
Filling gas	Nitrogen
Gas Pressure	<20PSL
External interface	Gas leak/ waterproof quick connect
Brackets	Options(Wall hanging/Draping)
Work temperature	-20°~150°C
Work Wetness	<95%
Size	245(H) x 135(L)mm
